

haaga 375

Order No.: 101040

Equipment

- **Turbo sweeping system = Sweeping twice in one step:** The disc brush system is extended with a fine-dirty brush behind it. This allows these machines to effectively sweep twice in one step. Even the most fine debris is collected.
- **Brush height adjustment:** infinitely variable for optimal sweeping on various grounds such as asphalt, concrete, slabs or for damp leaves, sand, uneven surfaces.
- The disc brushes, which protrude on both sides, ensure even greater sweeping performance
- High-quality and long-lasting disc brushes:
4 years warranty on brush wear
- Space-saving storage in upright position

Technical data

Working principle	Turbo sweeping system
Brush drive	Manually
Sweeping width	75 cm
Dirt container capacity (max.)	50 l
Sweeping performance	2.900 m ² /h
Weight	11,1 kg

Application areas

For occasionally sweeping operations for medium-sized areas up to 1.000 m² like petrol stations, workshops, parking spaces and yards.
